

PROJECT INSIGHT:

Challenge:

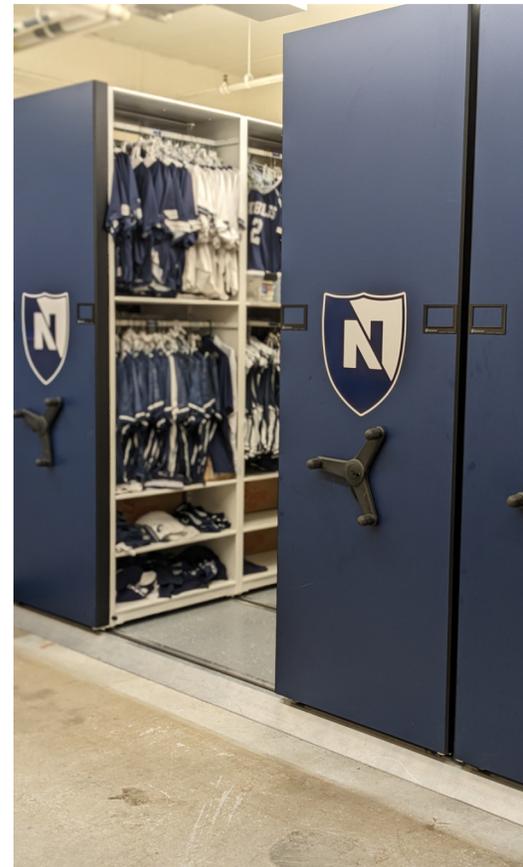

- Desired a functional, branded space to serve as a recruiting tool, and needed to increase storage capacity and improve equipment organization.

Solution:

- A new system was designed with custom branding on the end panels, matching the school's colors for a cohesive look.
- A window display was added with dedicated drawers and a countertop for customer interaction.
- The new system increased storage capacity by 50%, allowing for better organization and more efficient use of space.
- The system now keeps athletic equipment clean, organized, and protected, creating a more professional and appealing environment.

UPGRADED ATHLETIC EQUIPMENT STORAGE AT PRIVATE HIGH SCHOOL

A private high school sought to transform its athletic equipment storage space into a functional, visually appealing area that could also serve as a recruiting tool. The goal was to increase storage capacity, better organize equipment, and integrate the space with the school's branding.

The upgraded storage solution transformed the athletic equipment area into both a functional storage space and a visual asset for the school. The custom-designed system, which incorporated the school's branding and colors, not only increased storage capacity by 50% but also enhanced the organization and protection of equipment.
