SHELVING CONFIGURATION

The inside of a locker or equipment room is filled with thousands of items from helmets, jerseys, shoes, shoulder pads, endless amounts of tape, gauze, wraps, socks, gloves, towels, balls, mouth guards, face masks and water bottles, and it all has to be stored efficiently for daily retrieval.

Coaches, trainers and equipment managers will tell you that tackling athletic storage problems is some times harder than the tackling that goes on the field.

Organizing every piece of equipment allows players to quick access whenever it's needed. As storage experts we offer you:

- Double the storage capacity compared to traditional storage units
- Customized shelving to accommodate for any size or shape equipment
- Bags and bins for shoes, bulky equipment and protective gear
- Lockers for hanging jerseys and uniforms
- Drawers and cabinets for tools and first aid

Spacesaver takes pride in being the top choice for athletic equipment storage in K-12, collegiate and professional level sports teams throughout the world. We can design a storage solution to fit any space requirement, for any sport.
