

# WHY YOUR CANNABIS STORAGE MATTERS

**High Density Shelving** allows growers to use vertical warehouse space, doubling the growing capacity within the same footprint.

With solutions to help get you started, all the way to seed and sale, we offer products that will help you in any step of the growing process.

Areas we can help with:

- LOCKER ROOMS**
- CLONING ROOMS**
- GROWING AREAS**
- CURING & DRYING**
- TRIMMING AREAS**
- BULK STORAGE**
- TRANSPORTATION METHODS**
- VAULT & FINISHED GOODS**
- RETAIL SOLUTIONS**

With our drying racks, plants remain in place during harvest, transport, and drying which helps preserve plant quality by minimizing handling. Fewer touches means fewer crushed or disturbed leaves & buds.

**HIGH DENSITY = HIGH YIELDS**

Finished goods require extra security and protection. Having a caged off area with compact storage not only helps create more space, but it can also enhance your security before your product goes to sale.

Steel and Cannabis are a match made in grower heaven. Not only does steel help prevent rust and other harmful wear and tear, but it provides extra longevity too.

Our steel growing trays are designed to ensure optimal plant health. These trays contain sloped brackets to facilitate proper drainage, a 2.5" vertical profile, and they are coated in antimicrobial white paint for cleanliness, reflectivity, and corrosion resistance.

Additionally, using steel wire carts can add extra security to your transportation methods, all while keeping your plants safe and healthy.

**HARVEST,  
TRANSPORT, AND  
DRY ALL WHILE  
PRESERVING  
PLANT QUALITY  
AND INCREASING  
SPACE SAVINGS.**

Utilizing a storage specialist can streamline your growing operation from start to finish.
