ART RACK SOLUTIONS

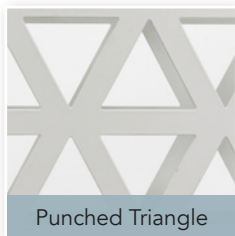

MOD-GLIDER PRO™ MODULAR ART RACK SYSTEM

EXPERIENCE **INNOVATIVE ART** STORAGE.

Spacesaver's Modular Art Rack system, Mod-Glider Pro™, combines smooth operation with versatile storage capacity. Its pullout screen loading is transferred directly to the floor, allowing for smooth and uninterrupted operation, while the choice of either welded wire or punched triangle pattern screens offers secured storage for many forms of visual art.

Welded Wire

Punched Triangle

Welded wire screens offer a simple and elegant solution for hanging collections storage and display. Commonly used as an economic solution for behind-the-scenes and hanging collections storage.

This Punched triangle pattern screen offers premium aesthetics, perfect for front-of-house display and making a greater volume of works visible to the public and clients.

Purpose-built accessories securely connect to screens, eliminating being dislodged during the hanging process and protecting hanging collections from accidental damage.

Please refer to the Accessory and Screen Options info sheet for more information.

EXPERIENCE **NEXT LEVEL** STORAGE IN YOUR SPACE.

MUSEUMS

Museums today face many challenges. Statistically, only 3% of collections are on display at a given time, meaning the majority of pieces need to be stored. This creates issues including ease of access for staff, greater visibility to collections for visitors, and continued protection and preservation of their collections. And, as funding and floor space are at a premium, it is key that museums find a solution that provides affordability and optimization.

PRIVATE COLLECTIONS

Whether your motivation is the collection, display, public image, or even support of emerging artists, your business' fine art and the space it occupies is invaluable. Little-to-no building modifications allow for easier setup and access for you and your guests in leased and owned spaces. The right collection can inspire and attract employees, encouraging them to think creatively. Some employers even utilize the selection of pieces as a prestigious perk for current and prospective team members.

LIBRARY/EDUCATION

An institution's hanging art and collections often serve as de facto archives for their communities. By accumulating art, memorabilia, and other artifacts that allow faculty to better protect the institution's history, administrators can provide a stronger representation of the benefits they offer to staff and students.

STANDARD DIMENSIONS

WIDTH 42" | 54" | 66" | 78" | 90" | 102"

EXPERIENCE **MODULAR** STORAGE.

Mod-Glider Pro Modular Art Rack System is designed with flexibility in mind and has proven successful in maximizing density and accessibility for a variety of users. Here's what our Modular Art Rack System can bring to your organization's collections:

PRESERVATION

- Placing your collections on our screens and off the floor ensure your investments are safely stored
- Organize and secure your collections for improved protection against the agents of deterioration, including mishandling and loss

ACCESSIBILITY

- Screens fully extend, allowing for quick and easy access to hanging art and other collections on both sides
- Double-sided screens and purpose-built accessories provide the perfect space-saving solution, allowing a greater volume of collections to be stored within a smaller footprint
- Installation requires minimal floor anchoring, making it a great solution for all spaces, whether leased or owned

VISIBILITY

- Make a greater percentage of stored works visible to staff and patrons
- Increase viewership by periodically rotating collections on and off display
- The sleek punched triangle screen offers premium aesthetics, perfect for front-of-house exhibitions and displays

DURABILITY

- Made in the USA of heavy-duty steel and high-quality components, Spacesaver's Modular Art Rack System is an enduring investment in quality collections storage
- Screens are cycle-tested to ensure lasting quality and performance on your investment for years to come
- High-capacity, non-marking nylon casters support loads of up to 800 pounds each and provide excellent resistance to wear and abrasion

EASE OF MOVEMENT

- Hooks and hanging accessories stay in position while you gently handle your artwork and navigate frame mounting hardware
- Built-in foot brake to keep screens stationary when not in use or in place when extended
- Lubricant-free slide design keeps art collections safe from contamination, allowing for ease of screen extension and minimal force to operate

FLEXIBILITY

- Designed to fit most any space and store a myriad of hanging art and collections
- Allows for system reconfiguration as collections stored change over time
- Purpose-built accessories give you the flexibility to easily hang and display a wide array of collections of varying shapes and sizes

SCREENS FULLY EXTEND
